

The day AFTER a tragedy

is not the day to learn you could have saved someone's life

In the event of a sudden cardiac arrest,
a victim will suffer irreversible brain
damage in as little as 4 minutes

In the event of a traumatic injury,
a victim can potentially bleed out
in as little as 3 minutes.

SAVE A LIFE NIGHT

Bystanders are the critical link to survival in those precious few minutes prior to the arrival of an ambulance. Join your friends and neighbors and learn the live-saving skills to help a victim in sudden cardiac arrest or from a life-threatening, traumatic injury.

DATE: Wednesday, June 5, 2019
TIME: 6:30 PM - 8:30 PM (Registration begins at 6 p.m.)
